## OUR COMPLIANCE

The Association of Rotational Moulders of Southern Africa (ARMSA) developed this South African Standard 1731:2017 in conjunction with the South African Bureau of Standard (SABS). It applies to polyethylene (plastic) chemical and water storage tanks.

The Tank Standard protects members of a broader construction, architecture, plumbing, landscaping and built industries as well as consumers against tanks of a lesser quality.

In order to get an official endorsement of our products (not covered by the SANS1731:2017, Makoro Tank Technologies approached Agrément South Africa to do a technical evaluation of our products. Our tanks were evaluated and tested and were subsequently approved fit-for-purpose.

This certification is the official endorsement of our confidence in the technical merits of our products.
